

The Gesellschaft Deutscher Chemiker (German Chemical Society, GDCh) is the largest chemical society in continental Europe with more than 31.000 members from academe, education, industry and other areas. The GDCh supports chemistry in teaching, research and application and promotes the understanding of chemistry in the public. The society, a registered charity, was founded in 1949 but builds on a long tradition that began in 1867 when its first predecessor organization, the Deutsche Chemische Gesellschaft, was founded in Berlin.

## Career Service

GESELLSCHAFT DEUTSCHER CHEMIKER

You want to come to Germany to study? Do research? Teach? See the web pages of the GDCh Career Service for valuable information about research programmes, grants, etc., etc.

## » **Welcome to Germany!** [www.gdch.de/germany](http://www.gdch.de/germany)

### General information

Why come to Germany? How do people live here? Find key information about (your) life in Germany.

### Residence permit, employment, insurance

Find out whether or not you need a visa, how the German social security system works and whatever else you need to know about life and work in Germany.

### Universities and research

Learn all about doing research in Germany. A database of research institutes and key information about grants and fellowships is included.

### Learning German

You do not necessarily have to know German to do research in Germany, though the language does help in daily life and gives you greater insight into German culture and traditions. Learn what your possibilities are for getting started with the German language.

### Important Internet pages for chemists

Find pages with information of particular interest to chemists.

The GDCh Career Service helps companies or scientists recruit well-qualified employees from all branches of chemistry. It also assists graduates and experienced experts who are looking for jobs.

## » **Job market** [www.gdch.de/stellen](http://www.gdch.de/stellen)

In our online job-listings, which are published daily, we publish positions for:

- Chemists
- Biochemists
- Food chemists
- Chemical engineers
- CTAs, chemical technicians, laboratory assistants
- Degree-holders in other life sciences and natural sciences professions.

To save you time searching, we break our available jobs down into different categories. One click takes you to positions that particularly interest you:

### Industry and civil service

Apart from our homepage, this is the most visited GDCh Internet page. On this page, job offerings are listed from every branch of industry and the civil service.

### The „Nachrichten aus der Chemie“ job market

View highlights from the current issue of „Nachrichten aus der Chemie“.

### Universities and research institutes

Each week you will find an up-to-date list of positions open to doctoral candidates and post-docs throughout the world.

### Professorships and assistant professorships

Positions are listed for professors as well as assistant and associate professors in Germany and abroad.

### Internships and Masters / Diploma theses

Companies with positions for internships and universities listing their Master thesis or German Diploma thesis programmes publish their offers here.

**Many of our job offers are published in English. Take a look. It's well worth while!**
