

Liebig-Lectureship

der Liebig-Vereinigung für Organische Chemie
in der Gesellschaft Deutscher Chemiker

19. 11. - 30. 11. 2007

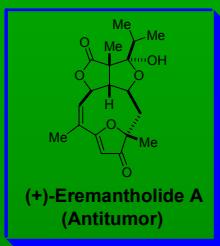

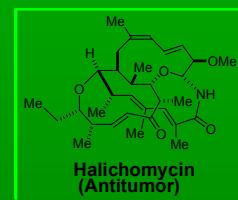

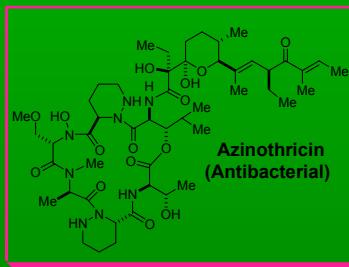

Prof. Dr. Karl J. Hale

School of Chemistry and Chemical Engineering
Queen's University of Belfast / United Kingdom

1) Total Synthesis and Chemical Genomics Studies on the A83586C/Azinothricin Natural Products and Towards a Biogenetically Modelled Asymmetric Total Synthesis of Halichomycin

2) Total Synthesis and Chemical Genomics Studies on the A83586C/Azinothricin Antitumor Agents and (+)-Eremantholide A

Research in Professor Hale's group is focused primarily upon the development of new organic reactions, on complex natural product total synthesis, on the use of natural products and their analogues as probes of cell signalling pathways, and on small molecule drug discovery.

Professor Karl J. Hale is currently a Professor of Organic and Medicinal Chemistry and Chemical Biology at the Queen's University of Belfast in Northern Ireland. His work in complex molecule total synthesis, new reaction development, and chemical genomics made him the recipient of a number of research prizes including the 1997 Zeneca Research Award in Organic Chemistry and the 1998 Pfizer Academic Award for Chemistry. Professor Hale serves as one of the Associate Editors of the American Chemical Society's journal *Organic Letters*.

Die Liebig-Vereinigung für Organische Chemie richtete 1999 eine Vortragsreihe – die Liebig-Lectureship – für herausragende ausländische Vertreter der organischen Chemie ein. Diese Vorträge führen die damit Ausgezeichneten an fünf oder mehr Forschungsinstitute ihrer Wahl.

Die vorherigen Inhaber der Liebig-Lectureship waren:

- 1999 Prof. Philippe Renaud, (damals) Universität Lausanne, CH
2000 Prof. Varinder K. Aggarwal, (damals) University of Sheffield, UK
2001 Dr. David M. Hodgson, Oxford University, UK
2002 Prof. Carolyn Bertozzi, University of California, Berkeley, USA

- 2003 Dr. Guy Lloyd Jones, University of Bristol, UK
2004 Dr. Jieping Zhu, CNRS Gif-sur-Yvette, France
2005 Prof. Robert Madsen, Danmarks Tekniske Universitet, Lyngby, Denmark
2006 Prof. Antonio Echavarren, Institute for Chemical Res., Taragona, España
